SUMMARY

Senior Cloud Infrastructure and Security Architect with 7+ years of experience designing and securing cloud and Microsoft 365 environments, specializing in Zero Trust architecture, Microsoft Purview, M365 Defender, Entra ID, Intune, Azure networking, and next-generation firewalls (Palo Alto, FortiGate). Proven leader in SOC 2 Type I & II, ISO 27001 alignment, and high-availability network architecture.

Demonstrated success in data loss prevention (DLP), sensitivity labeling, insider risk management, Data Lifecycle Management, endpoint security, and cloud governance, along with strong hands-on expertise in Azure networking, WAF, firewalls (Palo Alto, FortiGate). Adept at leading audits, building compliance score dashboards, managing cross-platform devices, and supporting global security operations in remote, fast-paced environments.

CERTIFICATION AND TRAINING

- Microsoft Certified: Information Security Administrator Associate **(Certified)**
- Cisco Certified Network Associate 200-301 **(Certified)**
- Amazon Solutions Architect Associate **(Certified)**
- Microsoft Azure Security Engineer **(Certified)**
- Microsoft Azure Administrator Associate **(Certified)**
- Microsoft Certified Solutions Experts (MCSE) **(Certified)**
- CCNP Routing and Switching ENCOR (350-401) **(Trained)**
- CCNP Security 350-701 SCOR Cisco Core Security Technology **(Trained)**
- Palo Alto Network Certified Network Security Engineer (PCNSE) **(Trained)**
- FortiGate Firewall NSE-4 **(Trained)**

EXPERIENCE

Senior Cloud Security and Compliance Architect

March, 2025 to Till Date

Treasury Cube (Remote @Houston Texas, America)

- Implement and manage sensitive labels in SharePoint, OneDrive, Teams and Email and protect organization data with Encryption email and documents with labels such as Confidential, highly confidential, internal use only.
- Configuration Data Loss Prevention for policy Exchange, SharePoint OneDrive and Teams.
- Implement and resolve cases of IRM policies such as Security policy violation, Risky Browser Usage, Data Leak Policy.
- Configured Purview Insider Risk Management for high-risk users (e.g., users with access to sensitive data and recent resignations).
- Created compliance score dashboards using Purview Compliance Manager, highlighting improvement actions and providing documentation trails for auditors.
- Implemented and managed Microsoft Defender for Cloud Apps (MDCA) to enhance visibility of user traffic.
- Conducted cloud discovery using traffic logs to identify unsanctioned ("shadow IT") cloud apps and implemented app governance controls.
- Used custom policies and session controls for real-time monitoring and control of user sessions to sensitive cloud applications.
- Designed and deployed Microsoft Intune to manage devices across multiple platforms.

- Designed and enforced compliance policies for Windows, iOS, and Android devices, reducing non-compliant devices
- Create and configured Endpoint privilege management, Antivirus, Firewall, and Disk Encryption Policies
- Achieved SOC 2 Type I and Type II readiness, mapped trust services criteria (security, availability, confidentiality), and implemented over 110+ control activities.
- Developed and maintained security policies and procedures aligned with ISO 27001 controls
- Designed quarterly internal audit programs, performed risk assessments, and documented audit findings with remediation plans.
- Completed SOC 2 Type I and transitioned to Type II within 12 months, supporting external audit with 100% evidence completeness.

Senior Cloud Engineer

Jan,2024 to March,2025

Treasury Cube (Remote @Houston Texas, America)

- Configure, deploy, and manage Azure WAF solutions to protect web applications from security threats.
- Investigated and mitigated security incidents related to web traffic and application vulnerabilities.
- Conducted penetration testing and vulnerability assessments to improve application security posture.
- Monitored and analyzed web traffic to identify potential threats and anomalies.
- Management of Azure infrastructure, subscriptions, Access Control, RBAC.
- Configured end-user laptop with Organization ID and registered their laptops with Entra ID.
- Architect, deploy, and manage Azure cloud solutions, ensuring alignment with best practices and organizational requirements.
- Configuring virtual machines, and Azure resource groups, Subscription and VM Reservations.
- Managing Entra users and External Users, groups, Microsoft Entra Joined devices and Microsoft Entra Registered Device.
- Using Azure Update Manager tools for automatically schedule Azure Virtual Machines updates.
- Experience with Office 365, including Teams, SharePoint Online, OneDrive, and Exchange Online.
- Deployment of Virtual Machines with Marketplace and Custom Images to Virtual Networks using Azure portal.
- Implementation of Virtual Machines with High Availability of different Zones through Internal Load Balancer.
- Configuration of Vnet, Network Security Groups, User Define Route and Load Balancers.
- Managing Microsoft licenses, Intune, Defender for cloud, Office 365 Business, Entra ID P2.

Assistant Manager – Networks

Oct, 2023 to Dec,2023

Data Check Limited

Assistant Manager – Network Infrastructure IT Operation

Feb, 2022 to Oct, 2023

Pak Suzuki Motor Company Ltd

- Upgrade Network devices for vulnerability compliances.
- Responsible for design, implementation, testing and improvement of the cloud platform.
- Migrated Firewall from FortiGate to Palo Alto.
- Configuration and maintain High Availability of Palo Alto.
- Configure SD-WAN solution on ISP interfaces on Palo Alto as well as Load Balancing.
- Responsible for configuration and administration of DC/DR Firewalls.
- SSL VPN and IPsec VPN enforcement, monitoring and troubleshooting.
- SLA monitoring and compliances related to Network Security Devices
- Maintain and troubleshoot of Cisco, FortiGate Firewall and Palo alto Firewall.
- Planning and designing of infrastructure for HA, Failover Cluster, Load Balance.
- Manage the enterprise virtual, physical infrastructure and also DR-Site.
- Responsible for scheduling, performance management, training and associate development.

- Ensure security of data network access, cloud management and backup systems.
- Design, develop, implement and coordinate systems, policies and procedures.
- Installation of P2P to access the client's restricted data to upload the sites.
- Centralize management of company wireless infrastructure around 30 Cisco wireless A.P through Cisco WLC Controller 3400.

Network Administrator

Sep, 2020 to Feb, 2022

360 Technologies (Ministry of Overseas Pakistani and HRD)

- Worked for Deployment of the network and security solution for upgrade data center project
- Created network deployment solutions documents for implementation and manage the smooth transition with limited downtime
- Secures network by developing network access, monitoring, control, and evaluation
- Upgrades network, systems and applications by conferring with vendors and internal procurement, developing, testing, evaluating and installing enhancements.
- Lead and motivate a team of administrative co-workers.
- Configure the network IP address, proxy, gateway and firewall rules.
- Documentation and diagram on MS Office & Visio for any network changes and procedures.
- Ensured daily backup of critical servers, oversaw backup, remote control and disaster recovery functions.
- Create test plans and schedule change records with coordination of 3rd party vendors & clients.
- Solutions cover all Core & Aggregation layers on Cisco ASRs, NEXUS switches, Palo Alto firewalls.
- Accomplished and documented security-related activities to maintain network security and data reliability
- Documented and completed various projects timely and effectively.
- Maintain a working relationship with key vendors.

Resident Engineer

Dec, 2019 to July, 2020

Jaffer Business (Dubai Islamic Bank at Head Office Karachi)

- Worked on Data Center upgrade and migration project as part Implementation core Network & Security team.
- Analyzed LAN/WAN to determine network performance problems. Provided solutions.
- Install, repair and preventative support to operating systems & Hardware
- Manage company accounts through Active Directory.
- Maintain service & deploy Windows 7, 8 and 10 workstations and laptops
- Responsible for the installation, maintenance, configuration and integrity of computer software
- Monitor all systems daily and respond immediately to security and usability concerns

EDUCATION

Ilma University Formerly IBT

Passing year 2019

Karachi, Pakistan

- Bachelor of Science in information technology (CGPA 3.22)
